CD205, pp.766-7. Oswald's literature distribution. Robert Lawrence Heller

My recollection may be in error, but I think I recall documents on Heller in CD75. I had not established a Heller file, had this data with me on my last trip to NO, but never had a chance to follow it or several other leads.

Is it not conspicuous that this report does not indicate Heller was shown any pictures of the Trade Mart distribution? Particularly when he appears to have observed closely, to have been concerned over Oswald although not knowing him, and when others indicate an unidentified man was then with him and bore a strong resemblance to an unidentified man of whom the FBI asked other witnesses who did not identify him. This report does not indicate anyone was with Oswald.

What is present is data that could be used to undermine Heller's credibility, which makes him a more interesting person. It is for this reason, in part, that I had intended to look him up. Perhaps the incomplete New York address is sufficient to locate him. Canyou try?
